And not a single extra penny was spent than was necessary, well let me explain, But if the clients buy our 050-6205-ARCHERPRO01 training quiz they can immediately use our exam products and save their time.

050-6205-ARCHERPRO01 test dumps are aiming at helping you to pass the exam in the shortest time and with the least amount of effort, And you can try them one by one to know their functions before you make your decision.

If you follow our learning pace, you will get unexpected [Reliable C_ARSPE_19Q2 Exam Blueprint](#) surprises, Also, the exam for RSA Archer Professional Exam helps you to prepare for the actual exam with its timed exam feature.

If you buy the 050-6205-ARCHERPRO01 study materials from our company, you just need to spend less than 30 hours on preparing for your exam, and then you can start to take the exam.

Although a lot of products are cheap, but the quality is poor, perhaps users have the same concern for our latest 050-6205-ARCHERPRO01 exam dump.

NEW QUESTION: 1 CORRECT TEXT

Use the Check Syntax button to verify your work. Any syntax or spelling errors will be reported by line and character position.

Answer:

Explanation:

```
WHERE header.SalesPersonID IS NULL
```

Explanation:

On line 8 add: IS NULL to get:

```
CREATE FUNCTION dbo.OrdersWithNoSalesPerson(@ProductID INT)
```

```
RETURNS
```

```
AS
```

```
header.SalesOrderID
```

```
FROM Sales.SalesOrderDetail detail
```

```
INNER JOIN Sales.SalesOrderHeader header
```

```
on header.SalesOrderID = detail.SalesOrderID
```

```
WHERE header.SalesPersonID IS NULL
```

```
AND detail.ProductID = @ProductID;
```

```
GO
```

Note: IS NULL determines whether a specified expression is NULL. If the value of expression is NULL, IS NULL returns TRUE; otherwise, it returns FALSE.

To determine whether an expression is NULL, use IS NULL or IS NOT NULL instead of comparison operators (such as = or !=). Comparison operators return UNKNOWN when either or

both arguments are NULL.

NEW QUESTION: 2

You want to access your database over SQL*Net with a client application that is running locally on your machine.

How would you enable access to port 1521 of the Compute Node (VM)?

- A. Use the Application Express Console to start the listener application.
- B. Use Oracle Compute Cloud Service to enable the ora_p2_dblistenersecurity rule.
- C. Run the lsnrctl reload listenercommand.
- D. Change the firewall rules.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

The DBaaS services are run under the Oracle Compute Cloud (IaaS). This has its own firewall configuration, allowing you to limit access to your services. By default, all endpoints except SSH are

disabled. There are a number of predefined "Security Rules" to open up the assorted endpoints, but they

typically open the endpoints to public, which is rather risky. Instead, you should define custom rules,

opening access to ports from specific machines.

Navigate to the main "Oracle Database Cloud Service".

Click on the hamburger next to the service of interest.

Click the "Access Rules" option on the popup menu.

Click the "Create Rule" button.

Enter a "Rule Name".

Select "" as the "Source" and enter your IP address in resulting box.

Select "DB" as the "Destination".

Enter "1521" as the "Destination Port(s)".

Leave "TCP" as the "Protocol".

Click the "Create" button.

You should now be able to connect to the database from the specified IP address.

Answer: A,C

NEW QUESTION: 4

A security professional is asked to provide a solution that restricts a bank teller to only perform a savings deposit transaction but allows a supervisor to perform corrections after the transaction. Which of the following is the MOST effective solution?

- A. Access is based on data sensitivity.
- B. Access is determined by the system.
- C. Access is based on rules.
- D. Access is based on user's role.

Answer: D
