The 050-758 practice materials in every time users need to master the knowledge, as long as the user can complete the learning task in this period, the 050-758 test material will automatically quit learning system, to alert users to take a break, get ready for the next period of study.

It is targeted, and guarantee that you can pass the exam, If you buy our products, [Latest 050-737 Test Cram](#) you can also continue your study when you are in an offline state, If you can pass the exam just one tie, then you will save both your money and your time.

Helping you pass the SUSE 050-758 exam at your first attempt is what we are desired and confident to achieve, If you are an efficient working man, purchasing valid study guide files will be suitable for you.

Yes, we understand it.

NEW QUESTION: 1

A company plans to move regulated and security-sensitive businesses to AWS. The Security team is developing a framework to validate the adoption of AWS best practice and industry-recognized compliance standards. The AWS Management Console is the preferred method for teams to provision resources.

Which strategies should a Solutions Architect use to meet the business requirements and continuously assess, audit, and monitor the configurations of AWS resources? (Choose two.)

- A.** Use Amazon CloudWatch Logs agent to collect all the AWS SDK logs. Search the log data using a pre-defined set of filter patterns that machines mutating API calls. Send notifications using Amazon CloudWatch alarms when unintended changes are performed. Archive log data by using a batch export to Amazon S3 and then Amazon Glacier for a long-term retention and auditability.
- B.** Use the Amazon CloudWatch Events near-real-time capabilities to monitor system events patterns, and trigger AWS Lambda functions to automatically revert non-authorized changes in AWS resources. Also, target Amazon SNS topics to enable notifications and improve the response time of incident responses.
- C.** Use AWS Config rules to periodically audit changes to AWS resources and monitor the compliance of the configuration. Develop AWS Config custom rules using AWS Lambda to establish a test-driven development approach, and further automate the evaluation of configuration changes against the required controls.
- D.** Use CloudTrail integration with Amazon SNS to automatically notify unauthorized API activities.

Ensure that CloudTrail is enabled in all accounts and available AWS services. Evaluate the usage of Lambda functions to automatically revert non-authorized changes in AWS resources.

- E.** Use AWS CloudTrail events to assess management activities of all AWS accounts. Ensure that CloudTrail is enabled in all accounts and available AWS services. Enable trails, encrypt CloudTrail event log files with an AWS KMS key, and monitor recorded activities with CloudWatch Logs.

Answer: C,E

Explanation:

Explanation

NEW QUESTION: 2

You need to deploy Office 365 ProPlus to the sales department computers by using an XML configuration file. The solution must meet the technical requirement.

Which attribute should you include in the XML file?

- A. TargetVersion
- B. OfficeClientEdition
- C. Version
- D. Product ID

Answer: B

Explanation:

Explanation/Reference:

Explanation:

The computers of the users in the sales department must have only the 64-bit version of Office 365 ProPlus installed.

Testlet 3

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. Note that the information displayed on the All information tab is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Fabrikam, Inc. is a medical billing clearing house that recently migrated from on-premises services to Office 365. The company has two offices. One office is in Atlanta, and one office is in Chicago. Accounting, IT, and claims department users are located in the Atlanta office.

Enterprise E3 licenses are assigned to all users. The current Site Collection administrator is Admin1.

Sales department users are located in the Chicago office only. The sales department plans to offer quarterly sales reviews with existing and potential customers. Up to 2,000 people are expected to attend each meeting.

All users have access to the following Office 365 services:

Office 365 ProPlus

Microsoft SharePoint Online

Microsoft Exchange Online

Microsoft OneDrive for Business

Microsoft Skype for Business

Business Requirements

Document sharing policy

Documents shared externally must not contain personally identifiable information (PII).

Sharing for any documents that contain PII must be blocked automatically.

Quarterly review meetings must be recorded and made available online for later viewing.

Office applications

You identify the following requirements for supporting Office applications on all corporate devices:

Users must not be able to download previous versions of Office.

Office updates must be available to users as soon as they are available.

Windows and macOS devices must have access to production-ready 2016 versions of Office

applications.

Atlanta office

You identify the following requirements to support users in the Atlanta office.

Users in the Atlanta office must not have access to any documents shared by the sales department.

External sharing must be disabled.

Users must access SharePoint Online by using the URL

<https://fabrikam.sharepoint.com/sites/atlanta>

Sales department

You identify the following requirements to support users in the sales department:

Users in the sales department must be able to share documents externally by using guest links.

External users must not be required to sign in when visiting a guest link.

Access SharePoint Online by using the URL <https://fabrikam.sharepoint.com/sites/chicago>

A legal disclaimer must be added to all outgoing emails.

Team members must be able to invite external users to dial into a conference by using a land-line or

mobile phone.

Accounting department

The accounting department must be able to set permissions for their own sites. User accounts named User1 and Admin1 must be notified if the storage for accounting users reaches 80 percent of the 1 terabyte (TB) limit.

You are unable to configure storage for the accounting department. The Site Collection ribbon for the accounting department site collection is shown below.

Claims department

The claims department frequently receives email that contain attachments. The approved list of attachment types includes:

PDF

JPEG

PNG

Other attachment types must be removed from email messages. If an attachment is removed, the original sender must be notified that their attachment was removed.

IT department

The IT department must be able to create eDiscovery cases. You must use eDiscovery to search email and conversations in the tenant.

eDiscovery case

The IT department must manage an eDiscovery case for the claims department. You must add the following user accounts as members of the case:

ITUser1

ITUser2

ITUser3

The case must have a hold placed on the Claims1 mailbox.

Testlet 4

Background

Contoso Ltd. manufactures and sells computers and related devices. Employees who work in the corporate headquarters use Microsoft Exchange Server, SharePoint Server, and Office 2016 to perform their daily job functions. Mobile and remote employees access resources in the on-premises environment by using VPN connections.

The company plans to transition to Office 365. You purchase Office 365 Business Premium Licenses for all users. Contoso, Ltd. uses System Center 2012 R2 Configuration manager to manage desktop software.

Office 365 environment

Deployment of all Office 365 applications must be controlled internally by administrators. Users must not have the ability to install Office 365 ProPlus on their own. All user initiated installations of Office 365 applications must be prohibited before administrative deployments are configured.

All additional Office 365 licenses must employ the minimum cost to provide the required service.

Integration between the on-premises and Office 365 environments must be configured where required.

Corporate policies

Services must be configured to enforce the following security policies:

All VPN connections must be secured by using a 256-bit, L2TP connection.

All users must use multi-factor authentication (MFA) when connecting over a VPN connection.

All content, including emails and documents, must be retained for three years after the last modification.

Any access to corporate content must require a user to sign in, even if the user is from an external

partner organization and is not yet known to the other Office 365 environment.
Sharing of credit card information must not be allowed through email, Microsoft OneDrive or

SharePoint.

All user passwords must be complex and expire every 30 days.

Allow Gmail users from partner organizations to automatically open encrypted emails sent from

Contoso, Ltd.

Client connections

All remote client connections to the on-premises environment must use a VPN connection.

Internal and external users from partner organizations must be able to dial in to audio conferences by

using their own mobile or landline phones.

Users must be able to access content in the on-premises SharePoint Server environment seamlessly

when connected to the SharePoint Online environment.

When users create objects in Office 365 that require a time zone setting, the time zone must always be

set to the Eastern Time (US & Canada) setting.

Employees

Employees must be able to perform the following actions:

Access all resources by using their Contoso Active Directory domain user account.

Invite users from business partners to participate in meetings.

Coordinate scheduling using Microsoft StaffHub.

All team settings should be consistent using a one-month schedule.

Add users from external partner organizations to teams.

File storage

You identify the following requirements for file storage:

All users must store documents in OneDrive storage.

All email attachments to on-premises Exchange Server mailboxes and Exchange Online mailboxes

must be saved automatically to OneDrive.

Users must be able to share documents from their OneDrive storage with other users including those in

other organizations.

Users must be notified only when someone else changes a document in their OneDrive.

Each user may store up to 50 gigabytes (GB) in OneDrive. Users may request an increase to this limit

by using a request process. The process is implemented as a SharePoint form in an on-premises SharePoint site.

Testlet 5

Background

ADatum Corporation is a manufacturing company that produces widgets. The company has a subsidiary that operates under the name Fabrikam, Inc.

You are the Office 365 administrator for ADatum. The company is in the process of moving to a cloud-only computing environment. You purchase a new Office 365 subscription. You create Office 365 groups for each department at ADatum and add the appropriate employee to each group.

Office 365 Software

All employee must be prevented from installing Office 365 ProPlus from the Office 365 portal

Microsoft Skype for Business Online needs to be configured for web meetings

Microsoft SharePoint Online must be used to store information collected from social media

Security

File names collected in repositories must not be visible in clear text

All data must be encrypted at rest

All connections to cloud environments must require multi-factor (MFA) authentication

All public facing websites must be hosted in the cloud

Employees must be able to join groups and access training materials from groups without requiring

permission from the group owner

All email from ADatum or Fabrikam must be verifiable

Online presence

Implement a web presence to display new products to potential customers

Product announcements must display product images

A collaboration site must be implement to allow employees to view how-to-videos for completing job

tasks

The collaboration site must be searchable based on presenter name, face detection, and transcript

information

Employees of the sales department must have the ability to receive and send tweets

All sales department employees must be able to view Twitter feeds

On-premises software management

The company uses System Center Configuration Manager (SCCM) to manage software installation and

maintenance of on-premises devices

Some line-of-business (LOB) legacy systems are running different versions of Office, including 2010,

2013, and 2016

Office applications must not be upgraded or uninstalled, but must still be managed and maintained

Software usage

All files and documents opened with Office applications must be recorded and sent to a central repository

Email

All email originated by ADatum or Fabrikam must support SPF and DMARC

Marketing department

The marketing department requires the ability to quickly publish announcements of new products with

images and photos

All members of the marketing department must be able to create a site for each new product

announcement

The marketing team needs to be able to access tweets that include the company name or one of the

product names through a storage location in Office 365

Sales

Members of the sales department must have access to Skype for Business Online

The sales employee's availability status must only be available to ADatum employees

Sales employees must have a collaboration environment that allows them to initiate chat, meetings,

and calls with other sales employees

The sales manager requires the ability to distribute information and schedules to the sales department

employees quickly and without using email messages

All sales employees must have access to all sales employees and partner organization employee's

schedules from a central location

The sales department manager must be able to import schedule information from Kronos Workforce

Central and integrate the information with the sales department schedule User training

ADatum requires the ability to make training available to all employees from anywhere

Employees must be able to access training videos, documents, and how to guides through a public-

facing website

Training videos must have the ability for employees to jump to a specific topic in the video without

having to fast forward through the video to find the topic of interest

All training material must be available to all employees in the organization but most not be available to

anyone outside the organization

NEW QUESTION: 3

Recently several employees were victims of a phishing email that appeared to originate from the company president. The email claimed the employees would be disciplined if they did not click on a malicious link in the message. Which of the following principles of social engineering made the attack successful?

- A. Authority
- B. Scarcity
- C. Spamming
- D. Social proof

Answer: A
