```

Which two are true concerning oplan?

- A. It will generate instructions for patching only storage servers.
- B. It will generate instructions for patching all the components on the Database Machine.
- C. It will generate instructions for patching the RAC Oracle Home on the primary location.
- D. It will generate instructions for patching the Grid Infrastructure home on the primary location.
- E. It will generate instructions for patching the Data Guard environment on the standby location.

**Answer: C,D**

Explanation:

Oplan generates instructions for all of the nodes in the cluster.

Note:

\*Oplan is a utility that facilitates you with the application of bundle patches on Exadata compute

nodes via Opatch. This new utility helps you with the patch process by generating step-by-step instructions telling you how to apply a bundle patch in your environment.

\*Exadata is much more than a "database-in-a-box." It is a set of compute nodes (think RAC node

servers) combined with ultra-fast infiniband (...and 10GB ethernet, and multiple 1GB ethernet) and

storage nodes.
