Explanation:

Note:

- \* DBMS\_REDACT.FULL completely redacts the column data.
- \* DBMS\_REDACT.NONE applies no redaction on the column data. Use this function for development testing purposes. LOB columns are not supported.
- \* The DBMS\_REDACT package provides an interface to Oracle Data Redaction, which enables you to mask (redact) data that is returned from queries issued by low-privileged users or an application.
- \* If you create a view chain (that is, a view based on another view), then the Data Redaction policy also applies throughout this view chain. The policies remain in effect all of the way up through this view chain, but if another policy is created for one of these views, then for the columns affected in the subsequent views, this new policy takes precedence.
