NEW QUESTION: 1

DRAG DROP

You plan to deploy a cloud service named contosoapp that has a web role named contosoweb and a worker role named contosoimagepurge.

You need to ensure the service meets the following requirements:

Contosoweb can be accessed over the Internet by using http.

Contosoimagepurge can only be accessed through tcp port 5001 from contosoweb.

Contosoimagepurge cannot be accessed directly over the Internet.

Which configuration should you use? To answer, drag the appropriate configuration setting to the correct location in the service configuration file. Each configuration setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

NEW QUESTION: 2

DRAG DROP

Drag and drop each extended ping IP header option from the left onto the corresponding description on the right.

Select and Place:

Answer:

Explanation:

Explanation/Reference:

Loose, Strict, Record, Timestamp, Verbose[none]:

IP header options. This prompt offers more than one option to be selected. They are:

Verbose is automatically selected along with any other option.

Record is a very useful option because it displays the address(es) of the hops (up to nine) the packet

goes through.

Loose allows you to influence the path by specifying the address(es) of the hop(s) you want the packet

to go through.

Strict is used to specify the hop(s) that you want the packet to go through, but no other hop(s) are

allowed to be visited.

Timestamp is used to measure roundtrip time to particular hosts.
