NEW QUESTION: 1

You work as a project manager for HRM Inc. You want to reduce the affective conflicts at all levels, and also attain and maintain a reasonable amount of substantive conflict. Which of the following processes will you use to accomplish the above task?

- A.** Conflict management
- B.** Change management
- C.** Quality management
- D.** Risk management

Answer: A

Explanation:

Explanation/Reference:

Explanation:

Answer option B is correct.

Conflict management involves the implementation of strategies to reduce the negative aspects of conflict and to increase the positive aspects of conflict at a level equal to or higher than where the conflict is taking place. Conflict management involves activities to reduce affective conflicts at all levels, attain and maintain a reasonable amount of substantive conflict, and use the appropriate conflict management strategy to effectively bring about the goals, and also to match the status and concerns of the two parties in conflict.

Answer option D is incorrect. Risk management is the identification, assessment, and prioritization of risks.

It is followed by coordinated and economical application of resources to minimize, monitor, and control the probability and/or impact of unfortunate events or to maximize the realization of opportunities. Risks can come from uncertainty in financial markets, project failures, legal liabilities, credit risk, accidents, natural causes and disasters as well as deliberate attacks from an adversary.

Answer option A is incorrect. The change management is a structured approach to transitioning individuals, teams, and organizations from a current state to a desired future state. It is an organizational process aimed at empowering the employees to accept and embrace changes in their current business environment. In project management, change management refers to a project management process where changes to a project are formally introduced and approved.

Answer option C is incorrect. The quality management plan is a component of the project management plan. It describes how the project team will implement the organization's quality

policy. The quality management plan addresses quality control (QC), quality assurance (QA), and continuous process improvement for the project. Based on the requirement of the project, the quality management plan may be formal or informal, highly detailed or broadly framed. NEW QUESTION: 2

During an inspection, it was found that data racks were not properly grounded. To pass the inspection and address a growing concern to project data cabling and equipment, a technician must make sure all racks are properly grounded. Which of the following tools should the technician use to verify this has been completed?

- A. Voltmeter
- B. Cable tester
- C. Multimeter
- D. Tone generator

Answer: C

NEW QUESTION: 3

A project manager has been moved to a new division and is in charge of an existing project in an unfamiliar domain. When attempting to gain an understanding of the risks for this agile project, what is the primary tool the project manager should employ?

- A. Collaborative discussions
- B. Interview with the project champion
- C. Workshops for risk avoidance
- D. Probability assessments

Answer: A
