We exclusively offer instant download ACP-Cloud1 free sample questions & answers which can give right guidance for the candidates.

NEW QUESTION: 1

While referring to Physical Security, what does Positive pressurization means?

- A. The air goes out of a room when a door is opened and outside air does not go into the room.
- B. A series of measures that increase pressure on employees in order to make them more productive.
- C. The pressure inside your sprinkler system is greater than zero.
- D. Causes the sprinkler system to go off.

Answer: A

Explanation:

Positive Pressurization is a condition that exists when more air is supplied to a space than is exhausted, so the air pressure within that space is greater than that in surrounding areas. This condition can cause the situation mentioned above in the answer B, you can make air go out of a room but not enter to it from the outside.

NEW QUESTION: 2

A Dell EMC NetWorker backup administrator is deciding between guest-level backups versus NetWorker VMware Protection. What are the advantages of using NetWorker VMware Protection?

- A. Disaster recovery, application consistent, and instant access
- B. Disaster recovery, changed block tracking, and instant access
- C. Disaster recovery, deduplication, and file-level incremental backups
- D. Local storage, VLAN, and file-level incremental backups

Answer: C

Explanation:

Explanation/Reference:

Explanation:

NEW QUESTION: 3

When a business analyst performs requirements tracing, he may need to trace the requirements backward through their lineage and may need to trace the requirements forward through their relationship to other requirements. What is the backwards tracing activity called in requirements traceability?

- A. Derivation
- B. Allocation
- C. Backwards pass
- D. Lineage tracking

Answer: A

Explanation:

Explanation

Backward tracing of a requirement is called its derivation, as the requirements may be derived from other older requirements.

Answer B is incorrect. Lineage tracking is not a valid term, so this choice is not valid.

Answer A is incorrect. Allocation is the forward tracking of a requirement to future requirements in the set of requirements.

Answer D is incorrect. Backwards pass isn't a valid requirements tracing term; it describes a process in schedule management.
