In such a way, the client can visit the page of our ADVRE exam questions on the website, Give you benefits & help you pass, And we can claim that if you prepare with our ADVRE exam questions for 20 to 30 hours, then you are able to pass the exam easily.

With the help of ADVRE exam training material, pass ADVRE : BCS Professional Certificate in Advanced Requirements Engineering exam is the easy thing for you, PayPal will guarantee your money and your benefits safe.

NEW QUESTION: 1

クラウドサービスを構成して、モバイルアプリケーションが共有を呼び出すために必要なシークレットを保存する必要があります。

ソリューションには何を含める必要がありますか？回答するには、回答の適切なオプションを選択してください。注：正しい選択はそれぞれ1点の価値があります。

Answer:

Explanation:

Explanation:

Every request made against a storage service must be authorized, unless the request is for a blob or container resource that has been made available for public or signed access. One option for authorizing a request is by using Shared Key.

Scenario: The mobile applications must be able to call the share pricing service of the existing retirement fund management system. Until the system is upgraded, the service will only support basic authentication over HTTPS.

The investment planning applications suite will include one multi-tier web application and two iOS mobile application. One mobile application will be used by employees; the other will be used by customers.

NEW QUESTION: 2

You have recently purchased a new wireless router. You would like to configure a name for your wireless network so that you can easily identify it when scanning available wireless networks. Which term describes this wireless network device name?

- A. Service Set Identifier (SSID)
- B. Wireless access point (AP)
- C. Default gateway
- D. Access Point Identifier (API)

Answer: A

NEW QUESTION: 3

You need to build a knowledge base in Data Quality Services (DQS).

You need to ensure that the data is validated by using a third-party data source before DQS processes the data.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Building a DQS knowledge base involves the following processes and components:

Step 1: Perform Knowledge Discovery

A computer-assisted process that builds knowledge into a knowledge base by processing a data sample

Step 2: Perform Domain Management An interactive process that enables the data steward to verify and modify the knowledge that is in knowledge base domains, each of which is associated with a data field. This can include setting field-wide properties, creating rules, changing specific values, using reference data services, or setting up term-based or cross-field relationships.

Step 3: Configure reference Data Services

A process of domain management that enables you to validate your data against data maintained and guaranteed by a reference data provider.

Step 4: Configure a Matching Policy

A policy that defines how DQS processes records to identify potential duplicates and non-matches, built into the knowledge base in a computer-assisted and interactive process.
