2022 Pass-Sure AI-102 Actual Exam Dumps.pdf | 100% Free Designing and Implementing an Azure AI Solution Detailed Answers

When choosing a reference resource for AI-102 exam test, some questions and doubts are along with that, you want to get the better exam dumps at a reasonable price.

Doks-Kyivcity is famous for its high-quality in this field especially for AI-102 certification exams, Our system is high effective and competent, It is a simulation of the formal test that you can only enjoy from our website.

Especially in such a fast-pace living tempo, we attach great importance to high-efficient learning, It is urgent for you to choose an effective and convenient method to prepare the AI-102 actual test.

App online version-Being suitable to all kinds of equipment [MB-800 Reliable Test Braindumps](#) or digital devices, supportive to offline exercises on the condition that you practice it without mobile data.

In order for each user to find a learning method that suits them, we will provide you with a targeted learning version and study plan, So our customers are very satisfied with our AI-102 study guide: Designing and Implementing an Azure AI Solution.

One more option for you to choose is using books, And you just need to spend one or two days to practice AI-102 test questions and know your shortcoming and strength in the course of test.

2022 AI-102: High-quality Designing and Implementing an Azure AI Solution Actual Exam Dumps.pdf

Dear, even if you pass the exam, you still can master the latest information about AI-102 exam

test, Doks-Kyivcity is committed to offer Doks-Kyivcity clients the easiest solutions to get through Doks-Kyivcity certifications exams.

We are committed to your success, Free update and half-off, **AI-102 Actual Exam Dumps.pdf** Free demo before buying, Designing and Implementing an Azure AI Solution exam dumps which covers all the knowledge points of the real Microsoft exam.

This will ensure Success in Exams everytime , Lower time cost, To be convenient for the learners, our AI-102 certification questions provide the test practice software to help the learners check their learning results at any time.

NEW QUESTION: 1

You have a requirement to cost all the employee's earning elements to the employee's cost center except for the corporate bonus. Identify the two ways through which you can cost the corporate bonus to a separate cost center.

- A.** Allocate 100% to the corporate cost center under Assignment costing (Navigation: People > Enter and Maintain > Assignment > Others > Costing).
- B.** Allocate 50% to the corporate cost center under Assignment costing (Navigation: People > Enter and Maintain > Assignment > Others > Costing).
- C.** Override the cost center of the employee at the element entry level.
- D.** Change the employee's organization cost center to the corporate cost center (Navigation: Work Structures > Organization > Description).
- E.** Set the element link to Fixed Costed. Specify the entire costing code combination at the element link level, (Navigation: Total Compensation > Basic > Link).

Answer: C,E

Explanation:

Explanation/Reference:

Explanation:

Costing needs to be done for an individual element entry and can therefore be done at the Element Entry Level (E). Alternative, the fixed costed method can be used in the element link whereby which costing information will not be determined from Assignment and Organization Levels (D).

NEW QUESTION: 2

Which RecoverPoint tool will give you an overview of the system state, based on the system's long term statistics?

- A.** Manage Event Filters
- B.** Balance Load
- C.** Detect Bottlenecks
- D.** Collect System Information

Answer: C

NEW QUESTION: 3

DB1という名前のAzure SQLデータベースを、SQL1という名前のAzure SQLサーバーにデプロイします。

現在、サーバー管理者のみがDB1にアクセスできます。

Analystsという名前のAzure Active Directory (Azure AD) グループには、DB1にアクセスする必要があるすべてのユーザーが含まれています。次のデータセキュリティ要件があります。

* The Analysts group must have read-only access to all the views and tables in the Sales schema of DB1.

* A manager will decide who can access DB1. The manager will not interact directly with DB1.

* Users must not have to manage a separate password solely to access DB1.

Which four actions should you perform in sequence to meet the data security requirements? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Step 1: From the Azure Portal, set the Active Directory admin for SQL1.

Provision an Azure Active Directory administrator for your Azure SQL Database server.

You can provision an Azure Active Directory administrator for your Azure SQL server in the Azure portal and by using PowerShell.

Step 2: On DB1, create a contained user for the Analysts group by using Transact-SQL Create contained database users in your database mapped to Azure AD identities.

To create an Azure AD-based contained database user (other than the server administrator that owns the database), connect to the database with an Azure AD identity, as a user with at least the ALTER ANY USER permission. Then use the following Transact-SQL syntax:

```
CREATE USER <Azure_AD_principal_name> FROM EXTERNAL PROVIDER;
```

Step 3: From Microsoft SQL Server Management Studio (SSMS), sign in to SQL1 by using the account set as the Active Directory admin.

Connect to the user database or data warehouse by using SSMS or SSDT

To confirm the Azure AD administrator is properly set up, connect to the master database using the Azure AD administrator account. To provision an Azure AD-based contained database user (other than the server administrator that owns the database), connect to the database with an Azure AD identity that has access to the database.

Step 4: On DB1, grant the VIEW and SELECT DEFINITION..
