NEW QUESTION: 1

The InfoLink function is enabled on an OceanStor 9000 storage system. If the node to which a client connects becomes faulty and a failover occurs, which of the following statements is incorrect?

- A. If the client accesses a shared directory through CIFS, the failover will cause disconnection and the client will need to reconnect to the storage system.
- B. If the client accesses a shared directory through NFS V3, the failover will not affect the connection.
- C. If the client accesses a shared directory through NFS V4, the failover will not affect the connection.
- D. If the client accesses a shared directory through NFS V4, the failover will cause disconnection and the client will need to reconnect to the storage system.

Answer: C

NEW QUESTION: 2

You need to configure a conditional access policy to meet the compliance requirements. You add Exchange Online as a cloud app.

Which two additional settings should you configure in Policy1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION: 3

A patient is to receive 25mg/hr of an aminophylline infusion. The solution prepared by the pharmacy contains 500mg of aminophylline in 1000ml of D5W. How many milligrams are available per ml?

- A. 0.25 mg/ml
- B. 2 mg/ml
- C. 0.5 mg/ml
- D. 1 mg/ml

Answer: C

NEW QUESTION: 4

Which two statements are true about traffic shaping? (Choose two.)

- A. Shaping buffers excess packets.
- B. It supports interaction with frame relay congestion indication.
- C. It is applied in the incoming direction only.
- D. Shaping can remark excess packets.

Answer: A,B

Explanation:

In contrast to policing, traffic shaping retains excess packets in a queue and then schedules the excess for later transmission over increments of time. Traffic shaping can also interact with a Frame Relay network, adapting to indications of Layer 2 congestion in the WAN. For example, if the backward-explicit congestion notification (BECN) bit is received, the router can lower the rate limit to help reduce congestion in the Frame Relay network.
