NEW QUESTION: 1

Which two statements are true about audit trails?

- A.** No custom fields can be audited, only standard fields.
- B.** Audit trail data is automatically purged from the system every six months.
- C.** Audit trails track these changes to a record: when the change was made, who made the change, the old and new values.
- D.** The Record Type Auditable Fields setting in the Company Profile determines the total number of fields that can be audited across all record types.
- E.** Audit trails are not available for any Custom Objects, only standard objects,
- F.** The Record Type Auditable Fields setting in the Company Profile determines the number of fields that can be audited for each record type.

Answer: C,F

Explanation:

B (not A): The total maximum number of audited fields allowed for your company across all record types is 30. If you want to increase the maximum number of audited fields, edit the Max # of Auditable Fields in your company profile. The total number of audited fields available and the number of different record types available are displayed on the Audited Fields page.

E: * To view the audit trail for a service request

1 Select the service request.

2 On the Service Request Detail page, scroll down to the Audit Trail related information.

Each row shows the date the record was updated, who made the update, and the new and old values in the field.

*To view the audit trail for a fund

1 Select the fund.

2 On the Fund Detail page, scroll down to the Audit Trail section.

Each row shows the date the record is updated, who made the update, and the new and old values in the field.

*To view the audit trail for an opportunity

1 Select the opportunity.

2 On the Opportunity Detail page, scroll down to the Audit Trail related information.

Each row shows the date the record is updated, who made the update, and the new and old values in the field.
