NEW QUESTION: 1

Fourth Coffee has deployed a Lync 2013 infrastructure. Company employees and guests joining from outside of the company do not report any issues with shared media. The company reports, however, that visiting consultants experience poor audio quality when they conduct peer-to-peer (P2P) audio sessions with Fourth Coffee employees who are located in the same office.

A section of the call data report (CDR) is represented in the following table:

You need to identify the root cause of poor audio quality. Which value should you choose?

- A. Lower burst gap duration
- B. Callee IP: 69.87.59.241
- C. Avg. round trip: 434 ms
- D. Applied bandwidth limit: 81 Kbps

Answer: B

NEW QUESTION: 2

Query results are stored in the Result Cache for how long after they are last accessed, assuming no data changes have occurred?

Select one.

- A. 24 hours
- B. 1 Hour
- C. 12 hours
- D. 3 Hours

Answer: A

NEW QUESTION: 3

You enter a patient's room and find the patient not breathing, no pulse, and unresponsive. You have

called for help. What is the next step?

- A. Open airway
- B. Oxygen
- C. Chest compressions

D. Bag mask ventilations

Answer: C

Explanation:

New standards in CPR emphasize chest compressions over airway, so the next step after calling for help is to check the pulse and begin chest compressions. Chest compressions should be given

immediately (30 for an adult patient), and then followed by opening the airway and beginning respirations.

Ventilation is only initiated when the airway is open or patent, as oxygen is not needed until the patient is breathing.
