Answer: D

NEW QUESTION: 2

Refer to the scenario.

Your customer is a New York based law firm, operating a single office, with 300 attorneys. It offers a complete business law service across the full range of legal specialization to both US-based and international clients, with cases often spanning many jurisdictions.

The law firm has implemented HP servers and storage solution at its primary and disaster recovery sites for several years. With the increased volume of cases handled by the firm, data volumes are reaching their maximum capacity.

The primary site consists of HP BladeSystem with ProLiant server blades and HP Storage 4000 EVA, approximately 5 TB of tier one data and 11 TB of tier two data. The secondary site has similar servers, but direct-attached storage. The network infrastructure consists of HP and third-party switches and routers.

The existing server environment lacks the performance and scalability to support existing and new applications. Furthermore, the primary site doesn't have the space to accommodate additional load. The future decision requires automating the complete operational lifecycle of the entire infrastructure.

The law firm purchased an HP 3PAR F200 array with 20TB of storage before you are able to present your HP Storage Solution as a part of your cloud solution. Which phase of Your CloudSystem sizing and configuration process do you now need to repeat?

- A. Order
- B. Design
- C. Build
- D. Discover

Answer: B
