NEW QUESTION: 1

Refer to the exhibit.

In a Cisco UCS environment, which switch mode does the exhibit portray?

- A. end host mode
- B. access mode
- C. switching mode
- D. core mode

Answer: A

NEW QUESTION: 2

Named workspaces are not a suitable isolation mechanism for strong separation between staging and production?

- A. True
- B. False

Answer: A

Explanation:

Explanation

Organizations commonly want to create a strong separation between multiple deployments of the same infrastructure serving different development stages (e.g. staging vs. production) or different internal teams. In this case, the backend used for each deployment often belongs to that deployment, with different credentials and access controls. Named workspaces are not a suitable isolation mechanism for this scenario.
