NEW QUESTION: 1
Exhibit:

All adjacencies have been formed, no extra options have been configured, and no policies have been written.
Referring to the exhibit, which two statements are correct? (Choose two.)
A. R1 cannot reach R5
B. R2 will create a default route and send it as a TLV to R1
C. R1 can reach R5.
D. R1 will create its own default route that points to R2
Answer: B,C

NEW QUESTION: 2
Your network contains an Active Directory domain named contoso.com. All client computers run Windows 8.1.
The network contains a shared folder named FinancialData that contains five files.
You need to ensure that the FinancialData folder and its contents are copied to all of the client computers.
Which two Group Policy preferences should you configure? (Each correct answer presents part of the solution. Choose two.)
A. Folders
B. Files
C. Network Shares
D. Shortcuts
E. Environment
Answer: A,B

Explanation:
Folder preference items allow you to create, update, replace, and delete folders and their contents.
(To configure individual files rather than folders, see Files Extension.) Before you create a Folder preference item, you should review the behavior of each type of action possible with this extension.
File preference items allow you to copy, modify the attributes of, replace, and delete files. (To configure folders rather than individual files, see Folders Extension.) Before you create a File preference item, you should review the behavior of each type of action possible with this extension.

NEW QUESTION: 3
All users have unrestricted access in a secured environment.
What must be modified to control this access?
A. Modify the advanced properties of the authorization namespace.
B. Disable anonymous access using IBM Cognos Configuration.
C. Remove the "Everyone" group from the "System Administrators" role.
D. Delete the "All Authenticated Users" group.
Answer: B
Explanation:
Explanation/Reference:
Explanation:
You can disable the Anonymous user account by changing the configuration parameters in the configuration tool.
This entry represents a user account shared by members of the general public who can access IBM Cognos software without being prompted for authentication. For example, this type of access is useful when distributing an online catalog.
Anonymous users can see only those entries for which access permissions are not set, or are set specifically for this account or for the Everyone group.
Incorrect Answers:
A: The built-in entries include the Anonymous user account, the groups All Authenticated Users and Everyone, and the role System Administrators. You cannot delete the built-in entries. They appear in both secured and non-secured environments.
