NEW QUESTION: 1

For what reason would you configure multiple security contexts on the ASA firewall?

- A. To separate different departments and business units.
- B. To enable the use of multicast routing and QoS through the firewall.
- C. To provide redundancy and high availability within the organization.
- D. To enable the use of VRFs on routers that are adjacently connected.

Answer: A

Explanation:

Explanation/Reference:

Explanation: You administer a large enterprise with different departmental groups, and each department wants to implement its own security policies.

Reference: <http://www.ciscopress.com/articles/article.asp?p=426641>

NEW QUESTION: 2

You are deploying OSPF on a point-to-multipoint Frame Relay network. The remote sites do not need to be able to communicate with each other and there are a relatively small number of sites (scaling is not a concern).

How should you configure OSPF for this topology to minimize the additional routing information injected into the network and keep the configuration size and complexity to a minimum?

- A. Configure the link as OSPF broadcast and configure the hub router to always be the designated router.
- B. Configure the link as OSPF broadcast and configure a mesh group towards the remote routers.
- C. Configure the link as OSPF nonbroadcast and manually configure each of the remote sites as a neighbor.
- D. Configure the link at the hub router as OSPF point-to-multipoint and at the remote routers as OSPF point-to-point.

Answer: A

NEW QUESTION: 3

Your organization has a Microsoft Office 365 subscription.

When the users attempt to access the Power BI Service, they receive the error message shown in the exhibit.

(Click the Exhibit button.)

You need to ensure that all the users can access the Power BI service.

What should you do first?

A. From the Power BI Admin portal, modify the Tenant settings.

B. From the Microsoft Azure Active Directory admin center, assign a Power BI (free) license to each user.

C. From the properties of each dashboard, modify the Share dashboard settings.

D. From Microsoft Azure PowerShell, run the Set-MsolCompanySettings cmdlet.

Answer: D

Explanation:

Explanation

You need to run the following cmdlet: Set-MsolCompanySettings -AllowAdHocSubscriptions \$true
