NEW QUESTION: 1
How does the process of systems auditing benefit from using a risk-based approach to audit planning?
A. Auditing risk is reduced.
B. Controls testing starts earlier.
C. Controls testing is more thorough.
D. Auditing resources are allocated to the areas of highest concern.
Answer: D
Explanation:
Explanation/Reference:
Allocation of auditing resources to the areas of highest concern is a benefit of a risk-based approach to audit planning.

NEW QUESTION: 2
your application connects to two REST services that list details about bank offices. One REST service uses a postal code as a GET parameter and returns a detailed list of bank offices in that postal code. The other REST service uses a city name as a GET parameter and returns a detailed list of bank offices in cities with that name. the application uses data pages to cache details about bank offices. Which approach do you use to populate a data page with a list of bank offices in a given postal code from the REST service?
A. Configure a REST connector data source. Configure the REST connector to reference the postal code from the work object using the Request Data Transform.
B. Configure a REST connector data source and pass the parameter page to the connector. Configure the REST connector to reference the same parameter in the query string for the Get method.
C. Configure a REST connector data source. Set the Endpoint on the Data Source to reference the postal code parameter value at the end of the URL.
D. Configure a REST connector data source and pass the postal code parameter to the Request Data Transform. Configure the REST connector to use the postal code in the query string for the Get method.
Answer: D

NEW QUESTION: 3
