NEW QUESTION: 1
Under a normal startup scenario, a managed server contacts the administration server to get its configuration information.
However in case the administration server is not available, which mechanism can be used by the managed server to start up successfully? (Choose the best answer.)
A. Cluster Mode
B. MSI Mode
C. Isolated Mode
D. Silent Mode
Answer: B
Explanation:
Explanation
When a Managed Server starts, it tries to contact the Administration Server to retrieve its configuration information. If a Managed Server cannot connect to the Administration Server during startup, it can retrieve its configuration by reading configuration and security files directly. A Managed Server that starts in this way is running in Managed Server Independence (MSI) mode
