It is one of the best ways to prepare for the real exam so you don't **Test EX415 Objectives Pdf** have to face any trouble later on, We have free demos for your information and the demos offer details of real exam contents.

NEW QUESTION: 1

リークマップを使用できるEIGRP機能はどれですか。

- A. アドレスファミリ
- B. オフセットリスト
- C. 隣人
- D. スタブ

Answer: D

Explanation:

If we configured an EIGRP stub router so that it only advertises connected and summary routes. But we also want to have an exception to this rule then we can configure a leak-map. For example:

```
R4(config-if)#router eigrp 1
R4(config-router)#eigrp stub
R4(config)#ip access-list standard R4_L0opback0
R4(config-std-nacl)#permit host 4.4.4.4
R4(config)#route-map R4_L0opback0_LEAKMAP
R4(config-route-map)#match ip address R4_L0opback0
R4(config)#router eigrp 1
R4(config-router)#eigrp stub leak-map R4_L0opback0_LEAKMAP
```

As we can see the leak-map feature goes long with 'eigrp stub' command.

NEW QUESTION: 2

- SELECT * FROM Orders
- WHERE OrderDate = 01/01/2011

A. Option D

- B. Option C
- C. Option A
- D. Option B

Answer: B

NEW QUESTION: 3

View the GlobalProtect configuration screen capture.

What is the purpose of this configuration?

- A. It enables a client to perform a reverse DNS lookup on 192.168.10.1 to detect that it is an internal client.
- B. It forces an internal client to connect to an internal gateway at IP address 192.168.10.1.
- C. It configures the tunnel address of all internal clients to an IP address range starting at 192.168.10.1.
- D. It forces the firewall to perform a dynamic DNS update, which adds the internal gateway's hostname and IP address to the DNS server.

Answer: A

Explanation:

Reference:

<https://www.paloaltonetworks.com/documentation/80/globalprotect/globalprotect-admin-guide/globalprotect-por-the-globalprotect-client-authentication-configurations/define-the-globalprotect-agent-configurations>

"Select this option to allow the GlobalProtect agent to determine if it is inside the enterprise network. This option applies only to endpoints that are configured to communicate with internal gateways. When the user attempts to log in, the agent does a reverse DNS lookup of an internal host using the specified Hostname to the specified IP Address. The host serves as a reference point that is reachable if the endpoint is inside the enterprise network. If the agent finds the host, the endpoint is inside the network and the agent connects to an internal gateway; if the agent fails to find the internal host, the endpoint is outside the network and the agent establishes a tunnel to one of the external gateways"

NEW QUESTION: 4

Refer to the exhibit.

A process on the host wants to access the service running inside this Docker container. Which port is used to make a connection?

- A. any port between 3000 and 5000
- B. only outbound connections between 3000 and 5000 are possible
- C. port 5000
- D. port 3000

Answer: D
