### **NEW QUESTION: 1**

#### **Answer:**

Explanation:

Explanation:

Box 1: show advanced options

Advanced configuration options are displayed by first setting show advanced option to 1.

Box 2: max worker threads

SQL Server uses the native thread services of the operating systems so that one or more threads support each network that SQL Server supports simultaneously, another thread handles database checkpoints, and a pool of threads handles all users. The default value for max worker threads is 0. This enables SQL Server to automatically configure the number of worker threads at startup. The default setting is best for most systems.

### **NEW QUESTION: 2**

Your CEO is keen to know the expected value of multiple components that interest him and wants you to give him a comparison of the expected value across components. You are currently looking for a tool to facilitate comparison of expected value across components and support informed portfolio decision making. What are you looking for?

- A. Portfolio Strategic Plan
- B. Value Measurement Framework
- C. Manage Portfolio Value
- D. Portfolio Process Assets

#### **Answer: B**

Explanation:

Explanation

The value measurement framework organizes the value that is to be created, how value will be measured, and recognizes the possible types of value; in addition it facilitates comparison of expected value across components and supports informed portfolio decision making. It is continuously improved by lessons learned through execution. The question asks about a tool

and not about a process or plan
