NEW QUESTION: 3

The application scenarios used by the TaiShan server are:

- A. Safe and reliable solution
- B. Distributed storage
- C. HPC
- D. Big data
- E. ARM native

Answer: A,B,C,D,E

NEW QUESTION: 4

You administer Windows 10 Enterprise desktop computers that are members of an Active Directory domain.

You want to create an archived copy of user profiles that are stored on the desktops. You create a standard domain user account to run a backup task.

You need to grant the backup task user account access to the user profiles.

What should you do?

- A. Set the backup task account as NTFS owner on all the profiles.
- B. Add the backup task account to the Backup Operators group on a domain controller.
- C. Add the backup task account to the Remote Management Users group on a domain controller.
- D. Add the backup task account to the Backup Operators group on every computer.

Answer: D

Explanation:

The Local Backup Operators group can back up and restore files on a computer, regardless of any permission that protect those files.
