NEW QUESTION: 2

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario exactly the same in each question in this series.

Your network contains a single Active Directory domain named contoso.com. All computers are members of the domain and run the 64-bit version of Windows 10 Enterprise. On a test computer named Computer_Test1, you pin several company-specific applications in a group named Contoso Apps, and then you export the start menu layout to a file named contoso.xml. You install Client Hyper-V on a computer named Computer6.

You identify the following requirements:

Install the Hyper V feature on a computer named Computer1.

Use virtual smart card authentication on a computer named Computer2.

Enable Secure Boot on a computer named Computer3.

Connect a computer named Computer4 to a projector by using Miracast.

Ensure that a user named User1 can use keyboard shortcuts by pressing one key at a time.

Ensure that you can share the clipboard between Computer6 and the virtual machines running on

Computer6.

Add the Contoso Apps group to the Start menu of a computer named Computer7.

Which hardware component is required for Computer1?

- A. Secure Boot
- B. Second Level Address Translation (SLAT)
- C. Trusted Platform Module (TPM)
- D. Trusted Boot

Answer: B
