NEW QUESTION: 1

- A. Option C
- B. Option A
- C. Option B
- D. Option D

Answer: A

NEW QUESTION: 2

Identify the situation in which you would use the Automatic Workload Repository (AWR) baseline template.

- A. when resetting the threshold values for the SYSTEM_MOVING_WINDOW baseline based on a repeating time schedule in the future
- B. when computing statistics for all moving window baselines based on a repeating time schedule in the future
- C. when creating AWR snapshots based on a repeating time schedule
- D. when creating and dropping AWR baselines based on a repeating time schedule

Answer: D

NEW QUESTION: 3

Which statement correctly describes the requisite PAM control flag? (Choose the best answer.)

- A. requisite flagged modules are ignored if they fail
- B. requisite flagged modules must be successfully checked for authentication to succeed. If a requisite module checks fails, the user is not notified until all other modules of the same module's type have been checked
- C. requisite items only play a role when no other modules of that module type have succeeded or failed. In that case, the success or failure of a requisite flagged module determines the overall PAM authentication for that module type

D. requisite flagged modules must be successfully checked for authentication to succeed. If a requisite module check fails, the user is notified immediately with a message reflecting the first failed required or requisite module

Answer: D

Explanation:

Explanation

Four types of control flags are defined by the PAM standard:
