#### **NEW QUESTION: 1**

Application performance test cases are most accurate if based on \_\_\_\_\_.

- A. quantitative success criteria
- B. vendor best practices

**Answer: A**

Explanation:

The best validation is to place a platform under a typical test of what it will be faced with in the field—for example, having a simulated number of users go through a workflow (perhaps a website). A lot of these tasks vary with the type of application and are primarily application functionality based. In addition, platform or infrastructure metrics are key for validation and for information to be used within the operational documentation (for example, troubleshooting guide, monitoring recommendations).

#### **NEW QUESTION: 2**
