NEW QUESTION: 1

The area where the project manager can have the greatest impact on the quality of his or her project is in _____

- A. Quality control
- B. Quality improvement
- C. Quality assurance
- D. Quality planning

Answer: C

Explanation:

Quality assurance is the management section of quality management. It is the collective term for the formal activities and managerial processes that attempt to ensure that products and services meet the required quality level. The project manager should establish administrative processes and procedures necessary to ensure and often prove that the scope statement conforms to the customer's actual requirements, to determine which processes will be used to ensure that stakeholders have confidence that the quality activities will be properly performed, and to ensure that all legal and regulatory requirements will be met. [Executing] Kerzner 2009, 888

NEW QUESTION: 2

A user is trying to launch an EBS backed EC2 instance under free usage. The user wants to achieve

encryption of the EBS volume. How can the user encrypt the data at rest?

- A. Use AWS EBS encryption to encrypt the data at rest
- B. The user cannot use EBS encryption and has to encrypt the data manually or using a third party tool
- C. Encryption of volume is not available as a part of the free usage tier

D. The user has to select the encryption enabled flag while launching the EC2 instance

Answer: B

Explanation:

AWS EBS supports encryption of the volume while creating new volumes. It supports encryption of the data at rest, the I/O as well as all the snapshots of the EBS volume. The EBS supports encryption for the

selected instance type and the newer generation instances, such as m3, c3, cr1, r3, g2. It is not supported with a micro instance.
