NEW QUESTION: 2

You are an administrator for an Azure subscription that is used by your company.

You have an Azure Web App that contains static content accessed by users. You plan to deliver content based on geographic location. The solution must allow clients to connect to a URL that ends in your corporate domain name of adatum.com. You must use the information provided by the portal for your on-premises modifications.

You need to implement the components in Azure to support the above requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NEW QUESTION: 3

You have an Azure subscription that contains 10 virtual machines. You need to ensure that you receive an email message when any virtual machines are powered off, restarted, or deallocated.

What is the minimum number of rules and action groups that you require?

- A. three rules and three action groups
- B. one rule and one action group
- C. one rule and three action groups
- D. three rules and one action group

Answer: D

Explanation:

An action group is a collection of notification preferences defined by the user.

Azure Monitor and Service Health alerts are configured to use a specific action group when the alert is triggered.

Various alerts may use the same action group or different action groups depending on the user's requirements.
