### **NEW QUESTION: 3**

A company uses Office 365 services. You implement the Windows Azure Active Directory Sync tool in the local environment.

An employee moves to a new department. All Office 365 services must display the new department information for the employee.

You need to update the employee's user account.

Where should you change the value of the department attribute for the employee?

**A.** The Active Directory management page in the Windows Azure Management Portal

**B.** The on-premises Active Directory

**C.** The Metaverse Designer

**D.** The Users and groups page in the Office 365 admin center

**Answer: B**

Explanation:

The Active Directory Synchronization allows you to sync your Active Directory Objects such as users and groups to your Office 365 account. This is a one-way synchronization, which means you continue to manage users On-Premises, and your changes will appear on Office 365 SharePoint. So if you want to change the user information of employee you must use the On-Premises Active Directory.
