### **NEW QUESTION: 1**

Your company has a private cloud that contains a System Center 2012 Service Manager instance. Service Manager has the Self-Service Portal installed. You create a service offering that contains a single request offering. The service offering provides logged-on users with the ability to add their user account automatically to a group named ServiceGroup1. The company's security policy requires that an administrator named Admin1 must approve all requests for group membership change. You need to configure the infrastructure to meet the requirements of the company's security policy.

What should you modify?

- A. the service request template
- B. the request offering
- C. the service offering
- D. the Service Offering Category list

**Answer: A**
