NEW QUESTION: 1

Your company uses Key Management Service (KMS) for Microsoft Volume Activation. You create a new Windows 7 image. You deploy the image to client computers.

You need to activate the KMS client on the client computers before the client computers are shipped to users.

Which command should you run?

- A. slmgr.vbs /ato
- B. slmgr.vbs /rearm
- C. sysprep /generalize
- D. sysprep /oobe

Answer: A

Explanation:

http://www.windowsnetworking.com/articles_tutorials/Windows-Server-License-Manager-Script-slmgrvbs.html

NEW QUESTION: 2

The maximum number of values in controlling picklists is the same as in dependent picklists.

- A. False
- B. True

Answer: A

NEW QUESTION: 3

There is a business requirement to cancel all related invoices when voiding a payment.

In which two scenarios the invoices can NOT be canceled?

- A. The invoice is fully matched to a Purchase Order which is fully received.
- B. The invoice is already accounted.
- C. The Invoice has been partially paid by a Prepayment.
- D. The invoice has been partially paid by another payment.
- E. The invoice has an associated withholding tax invoice.

Answer: C,D

Explanation:

You can cancel only unpaid invoices.

B: You can cancel any unapproved invoice, or an approved invoice that does not have any effective payments or posting holds. If an invoice has a hold that prevents posting, you must

release the hold before you cancel the invoice. You cannot cancel an invoice that has been selected for payment in a payment batch. A cancelled invoice does not show up in your invoice liability reports and you cannot pay or adjust a cancelled invoice. You can cancel single invoice distributions by reversing them.

C: You cannot cancel an invoice to which you have applied a prepayment.

You must first unapply any prepayments and void the payment that paid the prepayment. You can

then cancel the prepayment.
