### **NEW QUESTION: 3**

You have an Opswork stack defined with Linux instances. You have executed a recipe, but the execution has failed. What is one of the ways that you can use to diagnose what was the reason why the recipe did not execute correctly.

- A. Deregister the instance and check the EC2 Logs
- B. Log into the instance and check if the recipe was properly configured.
- C. Use AWS Config and check the Opswork logs to diagnose the error
- D. Use AWS Cloudtrail and check the Opswork logs to diagnose the error

**Answer: B**

Explanation:

Explanation

The AWS Documentation mentions the following

If a recipe fails, the instance will end up in the setup\_failed state instead of online. Even though the instance is not online as far as AWS Ops Works Stacks is concerned, the CC2 instance is running and it's often useful to log in to troubleshoot the issue. For example, you can check whether an application or custom cookbook is correctly installed. The AWS Ops Works Stacks built-in support for SSH and RDP login is available only for instances in the online state. For more information on Opswork troubleshooting, please visit the below URL:
