Do not worry, With Doks-Kyivcity's Fortinet NSE7_EFW-6.4 exam training materials in hand, any IT certification exam will become very easy, A useful certification can assist many workers to break through the bottleneck in the work.

NEW QUESTION: 1

In which of the following processes are the results of executing the quality activities recorded and monitored in order to assess performance and recommend necessary changes?

- A. Plan Quality
- B. Perform Quality Control
- C. Control Cost
- D. Perform Quality Assurance

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Answer option D is correct.

The Perform Quality Control process is one of the ten processes grouped in the Monitoring and Controlling Process group. During the Perform Quality Control process, results of executing the quality activities are recorded and monitored in order to assess performance and recommend necessary changes.

Inputs

Following are the seven inputs for the Perform Quality Control process:

Project management plan

Quality metrics

Quality checklists

Work performance measurements

Approved change requests

Deliverables

Organizational process assets

Outputs

Following are the seven outputs of the Perform Quality Control process:

Quality control measurements

Validated changes

Validated deliverables

Organizational process assets updates

Change requests

Project management plan updates

Project document updates

Answer option A is incorrect. The Plan Quality process is for identifying quality requirements and

standards for the project and product. This process also documents how the project will demonstrate compliance.

Inputs

Following are the seven inputs of the Plan Quality process:

Scope baseline

Stakeholder register

Cost performance baseline

Schedule baseline

Risk register

Enterprise environmental factors

Organizational process assets

Outputs

The Plan Quality process has the following five outputs:

Quality Management plan

Quality metrics

Quality checklists

Process improvement plan

Project document updates

Answer option B is incorrect. The Perform Quality Assurance process is used to review the quality requirements and outcomes from quality control measurements to make sure the quality standards are up to mark.

Answer option C is incorrect. The Control Cost process is used to examine the condition of the

project to update the project budget and deal with changes to cost baseline.
