With our test questions and test answers, you don't need to worry about OG0-022 certification, In any case, many people have passed the exam after using OG0-022 training materials.

### **NEW QUESTION: 1**

Your network contains an Active Directory domain named contoso.com. The domain contains six domain controllers named DC1, DC2, DC3, DC4, DC5, and DC6. Each domain controller has the DNS Server server role installed and hosts an Active Directory-integrated zone for contoso.com.

You plan to create a new Active Directory-integrated zone named litwareinc.com that will be used for testing.

You need to ensure that the new zone will be available only on DC5 and DCG.

What should you do first?

- A. Change the zone replication scope.
- B. Create an Active Directory connection object.
- C. Create an application directory partition.
- D. Create an Active Directory site link.

**Answer: C**

Explanation:

You can store Domain Name System (DNS) zones in the domain or application directory partitions of Active Directory Domain Services (AD DS). A partition is a data structure in AD DS that distinguishes data for different replication purposes. When you create an application directory partition for DNS, you can control the scope of replication for the zone that is stored in that partition.

### **NEW QUESTION: 2**

Which two things must your customer check daily in order to ensure that all their purchase order transactions from that day have been accounted for in Receipt Accounting Distribution?
