Explanation:
* (Not A, B, C): interval (here 10 seconds): Specifies the length in seconds to pause between
each interval report.
* duration (here 24 h)
* -R report[, report] (here high)
Print a summary report.
High Print a summary report detailing the highest usage of each resource and zone during any
interval of the zonestat utility invocation.

Note: The zonestat utility reports on the cpu, memory, and resource control utilization of the currently running zones. Each zone's utilization is reported both as a percentage of system resources and the zone's configured limits.

The zonestat utility prints a series of interval reports at the specified interval. It optionally also prints one or more summary reports at a specified interval.

The default output is a summary of cpu, physical, and virtual memory utilization. The -r option can be used to choose detailed output for specific resources.
