NEW QUESTION: 2

What is the default least time of the IP address allocated by the DHCP server

- A. 24 hour
- B. 12 hour
- C. 1 hour
- D. 18 hour

Answer: A

NEW QUESTION: 3

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in

the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

To start the lab

You may start the lab by clicking the Next button.

You need to add a deployment slot named staging to an Azure web app named

[\[email#160;protected\]](#)

The solution must meet the following requirements:

- When new code is deployed to staging, the code must be swapped automatically to the production slot.

- Azure-related costs must be minimized.

What should you do from the Azure portal?

Answer:

Explanation:

See explanation below.

Explanation

Step 1:

Locate and open the [\[email#160;protected\]](#) web app.

1. In the Azure portal, on the left navigation panel, click Azure Active Directory.

2. In the Azure Active Directory blade, click Enterprise applications.

Step 2:

Open your app's resource blade and Choose the Deployment slots option, then click Add Slot.

Step 3:

In the Add a slot blade, give the slot a name, and select whether to clone app configuration from another existing deployment slot. Click the check mark to continue.

The first time you add a slot, you only have two choices: clone configuration from the default slot in production or not at all.
