#### **NEW QUESTION: 1**

- A. Option D
  - B. Option C
  - C. Option B
  - D. Option A
- Answer: C,D**

#### **NEW QUESTION: 2**

A new company has the following:

- \* Two offices that connect to each other by using a low-latency WAN link
- \* In each office, a data center that is configured as a separate subnet
- \* Five hundred users in each office.

You plan to deploy Exchange Server 2016 to the network.

You need to recommend which Active Directory deployment to use to support the Exchange Server 2016 deployment What is the best recommendation to achieve the goal?

- A.** Deploy one forest that contains two sites and one site link. Deploy two domain controllers to each site. Configure both domain controllers as global catalog servers
- B.** Deploy one forest that contains two sites and two site links. Deploy two domain controllers to each site in each site, configure one domain controller as a global catalog server
- C.** Deploy one forest that contains one site and one site link. Deploy four domain controllers. Configure all of the domain controllers as global catalog servers.
- D.** Deploy two forests that each contains one site and one site link. Deploy two domain controllers to each forest. In each forest configure one domain controller as a global catalog server

**Answer: A**

### NEW QUESTION: 3

A solutions architect at an ecommerce company wants to back up application log data to Amazon S3. The solutions architect is unsure how frequently the logs will be accessed or which logs will be accessed the most. The company wants to keep costs as low as possible by using the appropriate S3 storage class.

Which S3 storage class should be implemented to meet these requirements?

- A. S3 One Zone-Infrequent Access (S3 One Zone-IA)
- B. S3 Standard-Infrequent Access (S3 Standard-IA)
- C. S3 Glacier
- D. S3 Intelligent-Tiering

**Answer: D**

Explanation:
