NEW QUESTION: 1

Your company has a main office and a branch office. Your network consists of one Active Directory domain. All domain controllers run Windows Server 2008.

You need to plan the installation of a new server as a read-only domain controller (RODC) in the branch office.

The plan must meet the following requirements:

-A branch office user must complete the RODC installation.

-The branch office user must only be a member of only the Domain Users security group.

What should you do first?

A. Create an organizational unit (OU) for the branch office. Delegate full control of the OU to the branch office user.

B. Pre-create a read-only domain controller (RODC) account for the branch office server.

C. Create an installation media by using ntdsutil.

D. Instruct the user to join the new server to the domain.

Answer: B

NEW QUESTION: 2

A. Option C

B. Option D

C. Option A

D. Option B

Answer: B

Explanation:

A standard switch can bridge traffic internally between virtual machines in the same port group and link to external networks.
