#### **NEW QUESTION: 3**

For a cube that represents values in Euros, what should be done for American consumers to see the appropriate currency symbol in Euros?

- A. Use more than one data source to supply the conversion rates.
- B. Set up currency conversion without defining a default currency.
- C. Manually create and update the base currency information.
- D. Build Cubes using a system locale that matches the measure locale.

**Answer: D**

#### **NEW QUESTION: 4**

You have an Azure subscription named Subscription1. Subscription1 contains a virtual machine named VM1.

You install and configure a web server and a DNS server on VM1.

VM1 has the effective network security rules shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1:

Rule2 blocks ports 50-60, which includes port 53, the DNS port. Internet users can reach the Web server, since it uses port 80.

Box 2:

If Rule2 is removed internet users can reach the DNS server as well.

Note: Rules are processed in priority order, with lower numbers processed before higher numbers, because lower numbers have higher priority. Once traffic matches a rule, processing stops. As a result, any rules that exist with lower priorities (higher numbers) that have the same attributes as rules with higher priorities are not processed.
